

City of Red Bud Notification System

The Mayor, Tim Lowry and the city aldermen have approved a voice or text notification system to be implemented for the residence of the city of Red Bud. The system will be used to inform the residence of Red Bud of community event, hazards, inclement weather and general notifications. The System allows a voice or text notification to be sent via phone message to your choice of one (1) cell phone or landline. **(Text option is not available for landline)**

If you are interested in signing up for this service, please list the one phone number you would like the notification to be sent to. It will be the responsibility of each resident to notify city hall of any information changes, such as address or phone number.

Date: _____
